You brought up the floc this morning, so here is a "refresh" of status for you to ponder and provide input.

Subject: RE: GK Mine Discharge- Temporary Treatment - Lime Addition / Floc Optimizer 83949 Floc Testing

I received a quote earlier today on the Nalco Optimizer 83949. The quote was direct from Nalco who say the product is only available in dry form. Are we sure it purchased in liquid form in the past, or is it possible it was purchased as powder and mixed? If we're sure it was liquid I will probe them some more.

CBI/Ex. 4

The Nalco accounting folks should have a new account set up for me by first thing tomorrow morning and I can order anytime after that. They say a rush order is 8 days.

Please advise for further action.

Thanks

Subject: FW: GK Mine Discharge- Temporary Treatment - Lime Addition / Floc Optimer 83949 Floc Testing

Matt,

FYI – the Copper Env team assisting with our current system performance and potential future lime addition based system at Glandstone has provided the following information. If we determine it is necessary to use Flocculent, then our current testing results are indicated below. The main point being

CB/Ex. 4

This does not require an immediate action, other than, the need to identify a supplier of the liquid form in tote size or equivalent was discussed before the long weekend.

Steve

Subject: RE: Optimer 83949 Floc

Hi Craig,
Yes, the NALCO Optimer 83949 was the floc we tested and we found it worked better with higher pHs (>6). At other lime treatment systems, we typically dose 1-5 ppm depending on pH, solids loading, and clarifier capacity. We've got about a dozen different flocculants we plan to test with treated water (pH 4.5 and up) from the Site to identify the best flocculant for low pH. We should have the testing completed in the next week or two (at most).

Let me know if you have additional questions.

Thanks,

Jim Jonas

Jim/Dave,
Is this the floc you all tested? If it is, what application rate should we expect to use? Thanks.

Steve,
I assume we're thinking this for when we move the treatment from the R&B to Gladstone?

Below is a quote for the floc you wanted, and attached is some information on it. For some reason I thought this was to be a liquid floc, but it comes in bags. Seems expensive. Let me know if you would like me to proceed with the order, and how much.
Thanks

Subject: RE: Introduction

Hi Matt,

This is a dry flocculant so I have the price per 55 pound bag and per pallet (40 bags). These prices include shipping, but do not include tax. I have attached the GHS SDS and the product data sheet. Please let me know how much you would like to order and the PO number. I will get everything going as quickly as possible. I can also help you with activation and makedown procedures. Please let me know if you have any questions about this or anything else.

Hi Mr. Francis,

I received the following information and would like to talk to you about how I may be able to meet your needs. I am local in Colorado and specialize in coagulants and flocculants. Please call or email me with any additional information you have and I will do what I can to meet your needs.

Caller Name : Matt Francis
Caller Telephone : 303 994-6611
Caller Email Address : m.francis@erllc.com<mailto:m.francis@erllc.com>
Company Name : Environmental Restoration
Caller's Address : 4870 Newport Street
Commerce City CO. 80022
Shipping Address :
1218 Greene Street
Silverton CO. 81433
Product : Optimer 8349
What does Company Do : Help customers clean the environment
User of Product : Flocculant
Resale : Company's Use
Export : No
Additional Details :
Thank you,
